This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PROGRESS OF NEW SOUTH WALES, 1860 to 1889 ..	Appendix.

PREFACE.

THE eight parts which this volume comprises have already been issued separately, and now appear in a collective form with a General Index. Since the publication of the various parts the information contained in them has been subjected to careful revision, and in some few cases the tables have been entirely recast. It is possible, however, that some errors may still remain uncorrected; if there be any such which come under attention information concerning their nature and position would be gladly received.

The following pages contain statistics only, and should therefore be read in conjunction with the "Wealth and Progress of New South Wales," an annual publication, based for the most part on the figures contained in this volume, and designed, as its title shows, to illustrate the resources of this Colony.

NOTE.—The total number of prisoners under sentence received into the various gaols does not agree with the total sentenced as given in a previous table; this is accounted for by the fact that many prisoners are transferred from one gaol to another, notably in the cases of Berrima and Trial Bay, where most of the prisoners received were transferred from other gaols

Works of the description shown in Table No. 2 are not included in any year. As it is of first importance to accurately classify the hands into their respective employments, it has been customary to subdivide works where more than one important industry is followed. Thus where boot-making and tanning are carried on in the same establishment, if both industries are large, they would be treated as separate works, so with engineering and joinery, brewing and cordial-making, &c. In 1889 the actual number of proprietors as distinguished from establishments was 2,871, and the number of works 2,926, as shown in the foregoing tables.

(a) In Municipalities supplied by the Metropolitan Water and Sewerage Board, the expenditure for water is not included.
(b) This does not include the total amount of interest payable on the Outstanding Debt, but only the sum paid out of the City Fund during 1889, as the interest at 6 per cent. on the Cattle Sale-Yards Loan of £60,000 is paid from that Special Fund, and a sum of £7,000, being interest at the credit of the Council on the minimum monthly balance of the Streets Loan Fund, was devoted that year to the payment of a portion of the interest due on that account.
(c) Does not include the sum of £25,733, expended on account of the City Sewerage Fund, administered by the Council.

(a) In Municipalities supplied by the Metropolitan Water and Sewerage Board, the expenditure for water is not included.
(b) This does not include the total amount of interest payable on the Outstanding Debt, but only the sum paid out of the City Fund during 1889, as the interest at 6 per cent. on the Cattle Sale-Yards Loan of £60,000 is paid from that Special Fund, and a sum of £7,000, being interest at the credit of the Council on the minimum monthly balance of the Streets Loan Fund, was devoted that year to the payment of a portion of the interest due on that account.
(c) Does not include the sum of £25,733, expended on account of the City Sewerage Fund, administered by the Council.
